Career Objective

Detail-oriented and passionate **Full-Stack Web Developer** with strong hands-on experience building modern, responsive web applications using the **MERN stack (MongoDB, Express, React, Node.js)** and **Next.js**. Adept at state management, REST API development, secure JWT authentication, and crafting mobile-first user interfaces with Tailwind CSS. Driven to deliver clean code, optimal performance, and intuitive user experiences.

Technical Skills

Category	Technologies & Tools
Frontend	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit
Backend & API	Node.js, Express.js, RESTful APIs, Next.js Server Actions, JWT Authentication
Database	MongoDB, Mongoose ORM, PostgreSQL (Basic), Prisma
Tools & Workflow	Git, GitHub, Postman, Vercel, npm/pnpm, VS Code, Environment Variables (.env)

Core Competencies

-
- Component-Driven UI Architecture & Responsive Grid Layouts
- Client-Side and Server-Side Rendering (SSR/ISR)
- Secure Authentication Flows (JWT & Cookie-Based Authorization)
- RESTful API Design, Middleware Implementation & Error Handling
- Clean, Modular Code Architecture & Version Control (Git/GitHub)

Key Projects

DigiTools — Modern Web Utilities Platform

Tech Stack: React.js, Tailwind CSS, Express | 2026

- Architected and built a responsive web application featuring custom navigation, dynamic tool routing, and clean modern aesthetics.
- Implemented modular, reusable React components with optimized render cycles and accessible UI elements using Tailwind CSS.
- Integrated client-side state handling to seamlessly update interactive developer tools with zero lag.

Social Contact Manager

Tech Stack: Next.js, MongoDB, Express, JWT | 2026

- Developed a full-stack social CRM dashboard with a custom 4-column grid layout tracking contact frequency and user engagement status.
- Built secure user authentication flows utilizing **JSON Web Tokens (JWT)** stored in HttpOnly cookies and protected API routes.
- Designed MongoDB schema using Mongoose to track "Days Since Contact", dynamic tags, and interaction logs.

DevPrep — Interactive Assessment Engine

Tech Stack: Node.js, React, REST API | 2025 – 2026

- Engineered a quiz platform testing technical mastery in React lifecycles, server vs. client rendering, and environment config.
- Created RESTful endpoints in Express with middleware validation to handle quiz evaluations and score persistence.

Practical Experience & Hands-On Practice

Open Source & Hands-On Engineering (MERN Stack)

2025 – Present

- Built 15+ full-stack and frontend projects implementing SSR/ISR patterns in Next.js, custom React hooks, and Express middleware.
- Enforced robust security standards including CORS configuration, password hashing with bcrypt, and environment variable isolation.
- Utilized Git/GitHub workflows with feature branching, pull request reviews, and continuous integration via Vercel deployments.

Education & Certifications

-
-

B.S. in Computer Science — State University (Graduated: May 2025)

- **Full-Stack Web Development Certification** — Meta / Coursera (Issued: Dec 2025)
